

Aspyre to a brighter future...

Powerful, web-based portfolio, programme, project & PMO software

Aspyre has been designed to help organisations deliver their programmes & projects on time and within budget.

Aspyre achieves this by:

- **Improving visibility** by showing which programmes and projects are taking place across your organisation
- **Eliminating duplication of effort** by showing who is responsible for what
- **Helping you prioritise** in terms of the benefits each programme or project will deliver
- **Increasing control** and assisting senior managers to identify projects and programmes that require urgent attention
- **Saving time by significantly reducing** the time taken to produce highlight and status reports. These can be produced within minutes instead of hours or even days

- **Improving programme and project governance**
- Guiding you through a proven benefits realisation process and helping you to **realise the benefits** of your investments
- **Increasing efficiency** by having all relevant information (risks and issues, costs and benefits, documents, resources, stakeholders, lessons learned), in a central repository, making it quick and easy to find relevant data
- **Incorporating best practice** from programme and project management methodologies, including Managing Successful Programmes (MSP) and PRINCE2
- **Facilitating better planning** by enabling people to use historical information and lessons learned
- **Enabling collaborative working** by sharing data across partner organisations
- **Improving communication** with key stakeholders
- **Making your programme and project meetings more effective** by ensuring that actions are captured and emailed to people

Flexible pricing - Software as a Service (SaaS) monthly rental or perpetual licence (one-off, capital cost)
Available anytime, anywhere with an internet connection
Painless upgrades - no patches for you to download or install

"For the first time there is consistency and a single version of the truth across all projects."
Capita Children's Services

"Thanks to Aspyre, we are now able to standardise our processes and accurately document project information and share it appropriately between people and organisations. It is already saving us a significant amount of time and is allowing our goal of increasing effectiveness and efficiency to become a reality."
Coventry & Warwickshire Local Health Community

"For the first time in our organisation we can see at a glance where we are in terms of overall progress on the programmes and projects that underpin it."
NHS South Birmingham

"It used to take me up to half a day to produce a single report. Now, thanks to Aspyre I produce 12 reports in a day."
Lincolnshire Community Health Services
